

Symposium V. Invited Speaker

Liwei Li, Ph. D

Deputy General Manager, ENN Solar Energy Co. LTD.

Dr. Li has 12 years experience in silicon based thin film photovoltaic technologies. He is currently Deputy General Manager of ENN Solar Energy in charge of technology development and manufacturing of large area Si thin film solar modules. Prior to joining ENN in 2009, Dr. Li was with Applied Materials' Solar Business Group where he was engaged in the development of Applied Sunfab technology and led process and hardware development of the world first, largest (5.7 m²) PECVD for PV applications. Before that, Dr. Li also served key technical positions in PV and thin film companies including EPV, TerraSolar, and Reveo, Inc. He has over thirty technical publications and has given invited talks in various international conferences.

Dr. Li obtained his Ph. D degree from New Jersey Institute of Technology, his MS and BS degrees from Xi'an Jiaotong University, all in Materials Science and Engineering.
