

Symposium II. Invited Speaker

Mr. Werner Filtvedt

Research Scientist, Institute for Energy Technology, Norway

Werner Filtvedt is currently working as a researcher at Institute for Energy Technology (IFE) in Norway where his research is focusing on development of novel reactors for production of high purity/quality silicon. Although he is 28 years old, he already holds 5 patents and patent applications on CVD silicon production.

In addition on part time, he is studying for a Phd degree on Fluidized Bed Technology for Polysilicon Production as well as being one of the active owners in the Dynatec Group.

Werner Filtvedt graduated in Applied Mathematics from The University of Oslo. His master thesis was on Analytical Fluid Mechanics. After obtaining his master, he worked as a researcher at Elkem Solar before he started his work at IFE.
