

Symposium VI Co-Chair

Prof. Frederic Dross principal Researcher, IMEC, Belgium

Frederic Dross received his PhD from the Ecole Nationale Supérieure des Telecommunications, Paris, France. He joined imec in 2005 first as a research engineer on solar cell technologies. He became first team leader and recently (January 2011) principal researcher. His research interest encompasses c-Si thin-film solar cells including fabrication of Si material and solar cell processing on glass, epitaxy-based solar cells, novel solar cell concepts such as all-Si tandem cells, and novel module concepts.
